

Early Spring Foods!

Join us to harvest nettles, dandelion, chickweed, sprouts, and other wild greens! We will demonstrate delicious recipes combining spring greens with the last winter storage vegetables. This class will include plant identification, harvesting, cooking demonstrations, and preservation techniques. We'll be outside all day, so come dressed for the weather and tromping around in tall grass.

*Workshop Taught by Nisqually
Garden Staff*

Continuing Education Units (CEUs) from NW Indian College will be offered.

There is no cost to attend.

*Please contact Caitlin Krenn,
