

Do you have a

Pressure Canner?

Did you know pressure canners need to be calibrated **yearly** to ensure they are reaching the right pressure for safe canning of foods like fish, meat, and many vegetables?

A Foods Preservation expert from Lewis County Cooperative Extension will be available to test your pressure canner.

When: Tuesday Sept 27th 10:00 am

Where: The Elders Center (Nisqually)

What: Bring the whole lid with the gage

**Elders are tested for free. Others are \$2 per pressure canner.*
