

Coronavirus Variant

Information on the Coronavirus Delta Variant B.1.617.2

RISING CONCERN

Originating in India, the Delta Variant is expected to become the dominant strain in the U.S. in the coming months. It currently makes up over 90% of new cases in the U.K.

VACCINES ARE HIGHLY EFFECTIVE

The Two-dose mRNA vaccines are 88% effective at protecting against this variant (two weeks after completing the vaccine series). 1 dose does not provide adequate protection for this variant. Schedule your vaccination appointment today.

MORE CONTAGIOUS & MORE SEVERE

Studies show this variant is 60% more contagious than previous variants and double the risk of requiring hospitalization.
